

I find it hard to believe that you would even consider limiting the ability of satellite radio to provide valuable, and in some cases, life saving information to the USA public! Have you ever tried SR? As a broadcaster from the 1950's I can tell you it is the best thing that has ever happened to radio, PERIOD. Most importantly, it can be reached virtually anywhere, anytime. If you approve NAB's petition 04-160 you are doing a great disservice to the American Public.  
Sincerely, Denton C. Smith
